

Winter - Spring 2016

Inorganic Discussion Group

UNIVERSITY OF BRITISH COLUMBIA

Seminars occur on Wednesdays at 7:00 PM in Chemistry D300

Date	Speaker & Title	Host
Jan 13 & 15	540C Seminars	Curtis Berlinguette
Jan 20	Dr. Saeid Sadeh – UBC A Flexible Approach to [1]Ferrocenophanes: Metallopolymers through a New Family of Chiral Sandwich Compounds	Derek Gates
Jan 27	Dr. Vincent Annibale – UBC Multidentate Actor Ligands for Small Molecule Activation	Michael Fryzuk
Feb 10	David Weekes – UBC Lanthanum Complexes as Therapeutic Agents for the Treatment of Bone Diseases	Chris Orvig
Feb 24	Marcus Drover – UBC N,O-ble Complexes of Rhodium and Iridium: How Love Turned Schafer to the Dark Side	Jennifer Love/ Laurel Schafer
Thurs, Mar 10 @ 4PM in D215	Dr. Lee Higham - Newcastle University Electronic Stabilisation: Surprises in Primary Phosphine Chemistry and Their Applications in Catalysis and Cellular Imaging	Michael Wolf
Mar 16	Hessam Mehr – UBC Badass Bonding - Unsettled Electrons in Shape-Shifting Molecules	Mark MacLachlan
Mar 23	Benjamin Rawe – UBC Shedding Light on Phosphorus: the Synthesis and Photophysical Properties of Novel Phosphorus-containing Macromolecules	Derek Gates
Apr 6	Nicholas Hein – UBC I Paid the Iron Price – Synthesis and Reactivity of Low-Coordinate Iron Complexes	Michael Fryzuk
Apr 20	Dr. Michael Neidig - University of Rochester Structure, Bonding and Mechanism in Iron-Catalyzed Cross-Coupling	Pierre Kennepohl
