

Winter – Spring 2019 Inorganic Discussion Group

UNIVERSITY OF BRITISH COLUMBIA

Seminars occur on Wednesdays at 5:00 PM in Chemistry D300

Date	Speaker & Title	Host
January 9	Han Hao – UBC Catalytic Hydroamination in Preparation of N-Containing Conjugated Materials	Laurel Schafer
January 23	Zhen (Allen) Xu – UBC Stimuli-Responsive Luminescent Material: Blinking and Afterglow	Michael Wolf
January 31 *Thursday* In D215	Dr. Michael Chan – City University of Hong Kong Shape-Persistent Molecular Architectures: Design, New Reaction Pathways and Catalysis, and Materials Applications	Mark MacLachlan
March 6	Dr. Jan Weigand – Technische Universität Dresden Sustainability and the Concept of “Oxidative Onionation” in P4 Chemistry	Derek Gates
March 13	Ben MacLeod – UBC Ada: A Self-Driving Laboratory for Thin Film Materials	Curtis Berlinguette
March 27	Lev Lewis – UBC Finding the Tipping Point: Responsive Gels from Cellulose Nanocrystals	Mark MacLachlan
April 24	Stephanie Barbon - University of California, Santa Barbara Structure-Property Relationships from Small Molecules to Materials	Zac Hudson
May 13 *Monday* at 2pm*	Dr. Yogi Surendranath – Massachusetts Institute of Technology Bridging Molecular and Heterogeneous Electrocatalysis Through Graphite Conjugation	Curtis Berlinguette
May 15	Dr. Peter T. Wolczanski – Cornell University Adventures in 1st Row Transition Elements: Experiment & Pedagogy	Michael Fryzuk
May 29	Rosalyn Falconer - University of Edinburgh Manipulating The Coordination And Reactivity Of Aluminium Using Mixed Donor N,p-ligands	Zac Hudson
