# Inorganic Discussion Group

UNIVERSITY OF BRITISH COLUMBIA

Seminars occur on Wednesdays at 7:00 PM in Chemistry D300

Date	Speaker & Title	Host
Jan 18	Mitch Perry – UBC Catalytic synthesis of amines: From small molecules to polymeric materials	Laurel Schafer
Jan 25 <b>@4PM in D215</b>	Dr. Peter Comba – Heidelberg University Bispidine derivatives as an efficient platform for targeted PET imaging	Chris Orvig
Feb 8 <b>@4PM in D215</b>	Andrea Terpstra – UBC Templating with a Twist: Synthesis of Chiral Nematic Mesoporous Materials	Mark MacLachlan
Feb 15	Khatera Hazin – UBC Brønsted Acid Initiators for the Cationic Polymerization of Olefins	Derek Gates
Mar 1	Jason Brandt – UBC 2-Functionalized Pyridines as Ligands for Early and Late Transition Metals; Explorations into Stoichiometric and Catalytic Hydrofunctionalization Reactions	Laurel Schafer
Mar 15	Hunter Wang – UBC From “Pa” to “Ox” : Next Generation Acyclic Chelators for Radiometals in Nuclear Medicine	Chris Orvig
Mar 29	Elise Caron – UBC Shining Light on Sulfur-bridged Conjugated Polymers	Michael Wolf
Apr 12 <b>@3PM in D215</b>	Dr. Jeff Byers – Boston College Dynamic and Switchable Iron-Based Catalysts for the Diversification of a Biodegradable Polymer	Parisa Mehrkhodavandi
Apr 19	Amanda Zimmerman – UBC Group 9 and 10 Complexes of an Unsymmetrical Electron-Rich Diphosphine Ligand	Michael Fryzuk
