

Letter for non-hazardous chemicals delivery.

Must be on UBC letterhead with Name, Title and Phone Number.

The letter must state that the:

- 1) product is not derived from livestock or avian species.
- 2) product is for in-vitro use
- 3) product has not been exposed to livestock or avian disease agents exotic to the United States
- 4) product does not produce antigens or contain genes of livestock or avian disease agents or does not produce monoclonal antibodies directed against livestock or avian stock.

Also have the shipper provide the following:

- 5) Identify the origins(species) of the product
- 6) As applicable, is the product natural, purified, or synthesized
- 7) Identify the country of origin of the product
- 8) Identify the intended use of the product
